Hamza Mughal's patch of DWM

Programs I use:
- Brave Browser
- Simple Terminal by Suckless
- Scrot for screenshots
- Ranger as terminal based file manager
- Dmenu as application launcher

Modkey:
- Super Key

Shortcuts I've configured for applications (ModKey +):
- b → opens browser (brave in my case)
- ctrl + b → launches private window (brave)
- return → opens terminal (st in my case)
- d → launch dmenu
- f → open ranger (file manager)

Other shortcuts (ModKey +):
- Shift + b → toggles visibility of bar
- j, k → switches focus in stack
- h, l → increase, decrease master width
- Alt + (h, l) → increase, decrease all gaps
- Alt + Shift + (h, l) → increase, decrease outer gaps
- Alt + Ctrl + (h, l) → increase, decrease inner gaps
- Alt + 0 → toggle gaps
- Alt + Shift + 0 → default gaps
- Shift + return → change master
- Tab → switch between two workspaces
- Shift + q → kill a window
- Ctrl + "," comma, "." period → cycles through layouts
- Shift + Space → toggle floating
